Setup

1. Precautions

1-1. Operating environment and conditions

Please do not install the device in the following locations. It may damage the device or shorten the life.

- 1) Locations out of operating temperature range -5 to 50°C.
- 2) Locations out of operating humidity range 35 to 85%, or locations where freezes / condensens.
- 3) Locations with high concentrations of dusts, metal powders etc.
(Required measures against heat radiation and storage to the dust-proof case.)
- 4) Locations with corrosive gas, salinity or soot.
- 5) Locations which has a influence of vibration or impact.
- 6) Locations where the unit may come in contact with rain or water drop. (except the front bezel)
- 7) Locations with a strong electromagnetic fields or exogenous noise.

1-2. Mounting and connection

- 1) Please read this manual before installation and connection. Also, please install and connect by the person who has professional skills. The insulation class of this unit is as below. Please check the insulation class satisfies the requirement before installation.

| | |
|------------------|---------------------------------|
| Basic insulation | |
| Power supply | Comparative output |
| | Input |
| | External control, Analog output |

- 2) Do not connect power connect line, input signal line and output signal line near the noise source or the relay driving line.
- 3) Connecting with the noise superimposed line or storing in the same duct may cause operation failures.
- 4) This unit is available as soon as the power supplied, but needs 30 minutes electrification to show the best performance.

1-3. Check before using

Installation location must meet the requirement of operating conditions and operating environments.

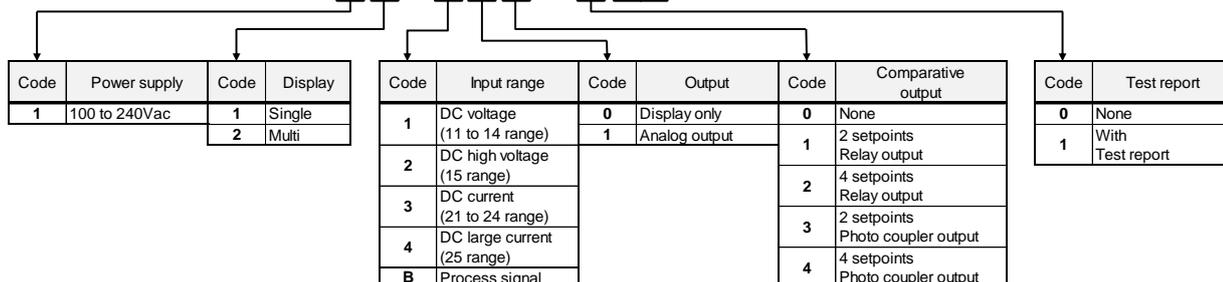

Please inspect the product for any signs of shipping damage and contact your dealer or Watanabe Electric Industry Co., Ltd if anything comes to your attention.

2. Ordering information

2-1. Ordering code

The ordering code of the WPM-1 is shown below. Please check that the product received matches the product ordered.

WPM - 1 - □□ - □□□ - □□□□

2-2. Accessories

Please check if you have all the accessories below.

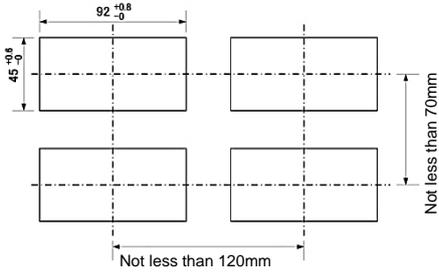

Protective cover for terminal block

'Display only' / 'with Analog output' : 2pcs, with Comparative output : 3pcs

3. Installation

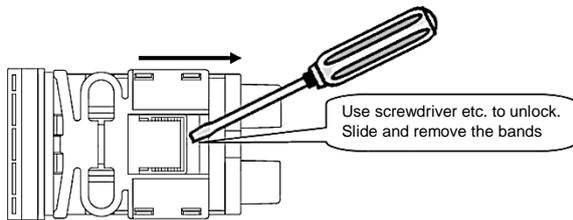

3-1. Panel cutout dimensions

Panel cutout is as the diagram shown below.

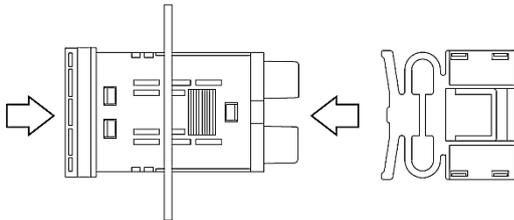

3-2. Mounting

- 1) Remove the mounting bands from the main unit,

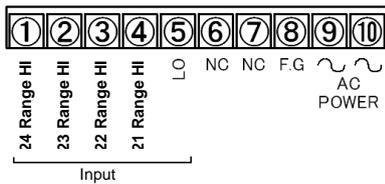

- 2) Insert the unit from the front side of the panel. Then, fix the unit in place from the rear of the panel using the mounting bands to the left and right sides.

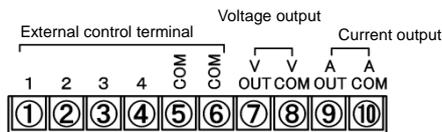

4. Terminal connections

4-1. Lower terminal connections (Input / power supply)

| Terminal | Name | Description |
|----------|----------|---|
| 1 | 24 HI | Input + terminal, range 24 |
| 2 | 23 HI | Input + terminal, range 23 |
| 3 | 22 HI | Input + terminal, range 22 |
| 4 | 21 HI | Input + terminal, range 21 |
| 5 | LO | Input - terminal |
| 6, 7 | NC | No connection (Intermediate terminal cannot be used) |
| 8 | F.G | |
| 9,10 | AC POWER | AC Power supply terminal |

4-2. Upper terminal connections (External control / analog output)

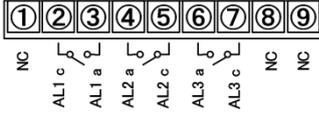

| Terminal | Name | Description |
|----------|-------|-------------------------------------|
| 1 | 1 | External control terminal 1 |
| 2 | 2 | External control terminal 2 |
| 3 | 3 | External control terminal 3 |
| 4 | 4 | External control terminal 4 |
| 5,6 | COM | External control common terminal |
| 7 | V OUT | Analog voltage output + terminal |
| 8 | V COM | Analog voltage output - terminal *1 |
| 9 | A OUT | Analog current output + terminal |
| 10 | A COM | Analog current output - terminal *1 |

*1 Please do not short-circuit between voltage output - terminal and current output - terminal.

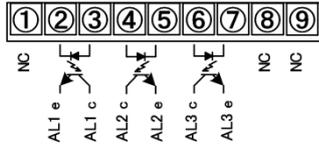

4-3. Intermediate terminal connections (2 setpoints comparative output)

WPM-1-□□-□□□1-□□□
2 setpoints relay output

| Terminal | Name | Description | Relay output |
|----------|-------|---|----------------------------|
| 1 | NC | No connection (Intermediate terminal cannot be used) | - |
| 2 | AL1 c | AL1 comparative output common terminal | COM |
| 3 | AL1 a | AL1 comparative output terminal | Normal open (a contact) |
| 4 | AL2 a | AL2 comparative output terminal | Normal open (a contact) |
| 5 | AL2 c | AL2 comparative output common terminal | COM |
| 6 | AL3 a | AL3 comparative output terminal | Normal open (a contact) |
| 7 | AL3 c | AL3 comparative output common terminal | COM |
| 8,9 | NC | No connection (Intermediate terminal cannot be used) | - |

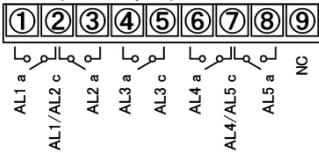

WPM-1-□□-□□□3-□□□
2 setpoints photo coupler output

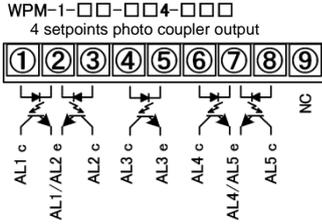

| Terminal | Name | Description | Photo coupler output |
|----------|-------|---|----------------------|
| 1 | NC | No connection (Intermediate terminal cannot be used) | - |
| 2 | AL1 e | AL1 comparative output common terminal | Emitter |
| 3 | AL1 c | AL1 comparative output terminal | Collector |
| 4 | AL2 c | AL2 comparative output terminal | Collector |
| 5 | AL2 e | AL2 comparative output common terminal | Emitter |
| 6 | AL3 c | AL3 comparative output terminal | Collector |
| 7 | AL3 e | AL3 comparative output common terminal | Emitter |
| 8,9 | NC | No connection (Intermediate terminal cannot be used) | - |

4-4. Intermediate terminal connections (4 setpoints comparative output)

WPM-1-□□-□□□2-□□□
4 setpoints relay output

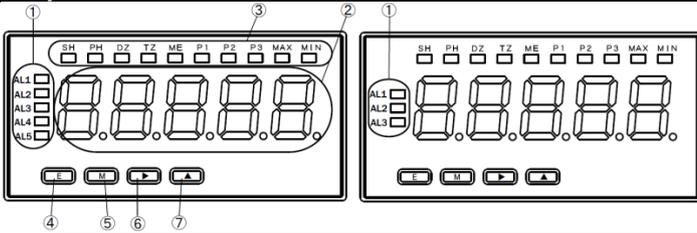

| Terminal | Name | Description | Relay output |
|----------|----------|---|----------------------------|
| 1 | AL1 a | AL1 comparative output terminal | Normal open (a contact) |
| 2 | AL1, 2 c | AL1/AL2 comparative output common terminal | COM |
| 3 | AL2 a | AL2 comparative output terminal | Normal open (a contact) |
| 4 | AL3 a | AL3 comparative output terminal | Normal open (a contact) |
| 5 | AL3 c | AL3 comparative output common terminal | COM |
| 6 | AL4 a | AL4 comparative output terminal | Normal open (a contact) |
| 7 | AL4, 5 c | AL4/AL5 comparative output common terminal | COM |
| 8 | AL5 a | AL5 comparative output terminal | Normal open (a contact) |
| 9 | NC | No connection (Intermediate terminal cannot be used) | - |

| Terminal | Name | Description | Photo coupler output |
|----------|----------|---|----------------------|
| 1 | AL1c | AL1 comparative output terminal | Collector |
| 2 | AL1, 2 e | AL1/AL2 comparative output common terminal | Emitter |
| 3 | AL2 c | AL2 comparative output terminal | Collector |
| 4 | AL3 c | AL3 comparative output terminal | Collector |
| 5 | AL3 e | AL3 comparative output common terminal | Emitter |
| 6 | AL4 c | AL4 comparative output terminal | Collector |
| 7 | AL4, 5 e | AL4/AL5 comparative output common terminal | Emitter |
| 8 | AL5 c | AL5 comparative output terminal | Collector |
| 9 | NC | No connection (Intermediate terminal cannot be used) | - |

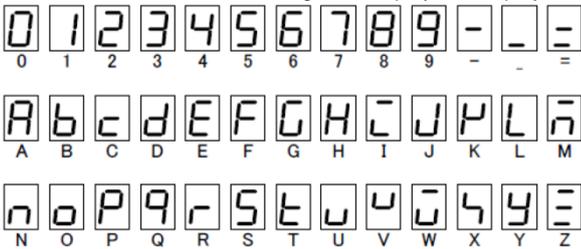

5. Component names and functions

| No. | Name | Main Functions |
|-------------------------------------|----------------------------|---|
| 1 | Comparative output display | Displays judgment result of comparative alarm function |
| 2 | Main display | Displays measured value, parameters and set values when settings. |
| 3 | Function indicators | SH Lights up when sampling hold is activated. |
| | | PH Lights up when peak hold, bottom hold or peak-to-peak is activated. |
| | | DZ Lights up when digital zero is activated. |
| | | TZ Lights up when tracking zero is activated. |
| | | ME Lights up when digital zero backup is activated. |
| | | P1-P3 Lights up according to the selected pattern. |
| | | MAX Flashes when max. display value |
| MIN Flashes when min. display value | | |
| 4 | ENTER key | Switches display and sets selected set value. Switches to the Setting mode when holding the key down for 3 seconds. (Cancels settings by pressing [ENTER] key and [MODE] key for 3 seconds at the same time.) |
| 5 | MODE key | Switches display. Switches measured value and % value display. Switches to the Memory mode when holding the key down for 3 seconds. (Memory mode displays Max. and Min. measurement value, difference between Max. and Min. measurement value and input value before scaling.) |
| 6 | SHIFT key | Switches display and clears comparative alarm latch. Digital zero when holding the key down for 3 seconds. |
| 7 | UP key | Switches display and selects setting parameters. Switches display of comparative set values. Switches pattern select when holding the key down for 3 seconds. |

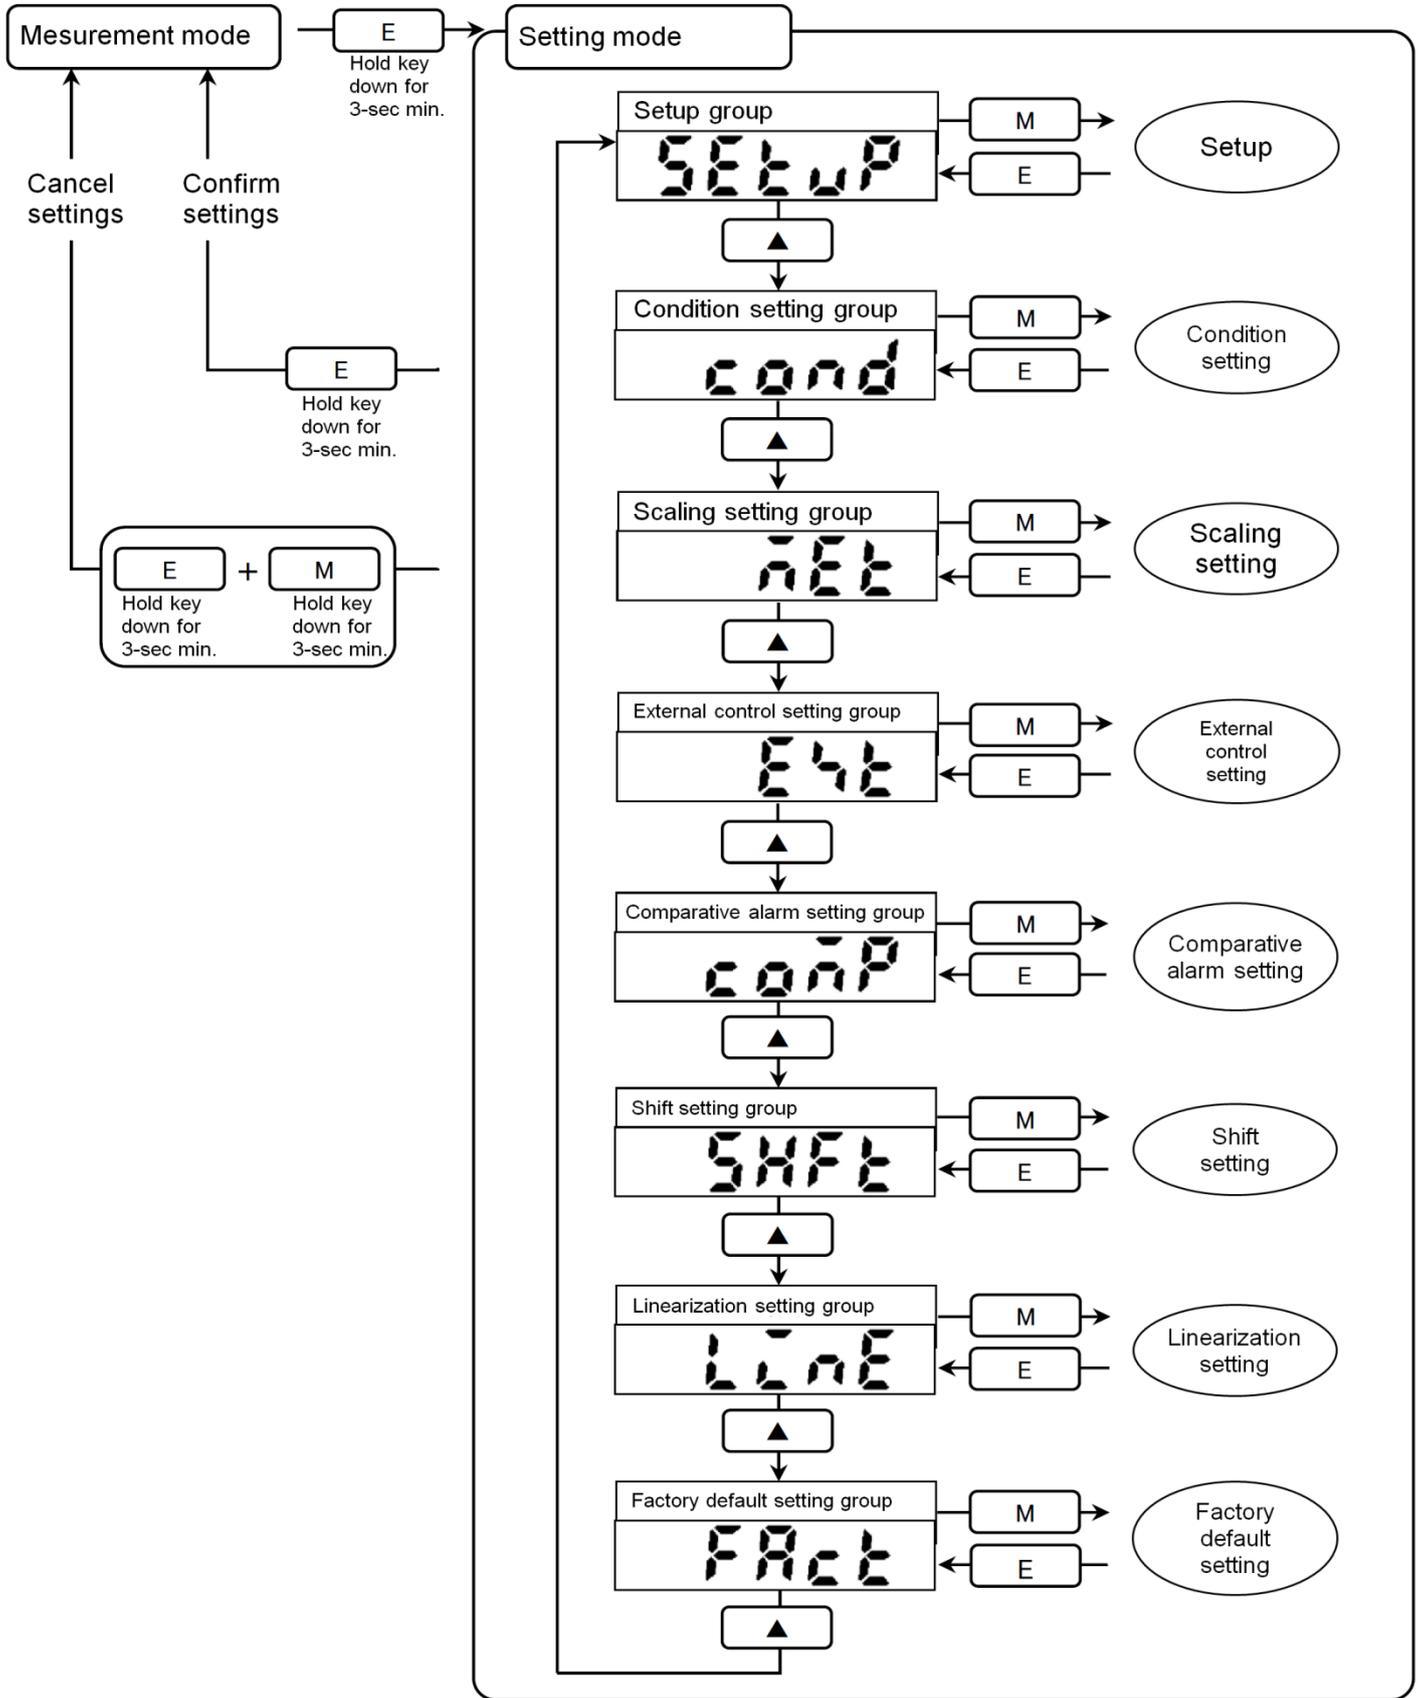

6. Character representation

The characters on the seven segment display are displayed as below.

Operation

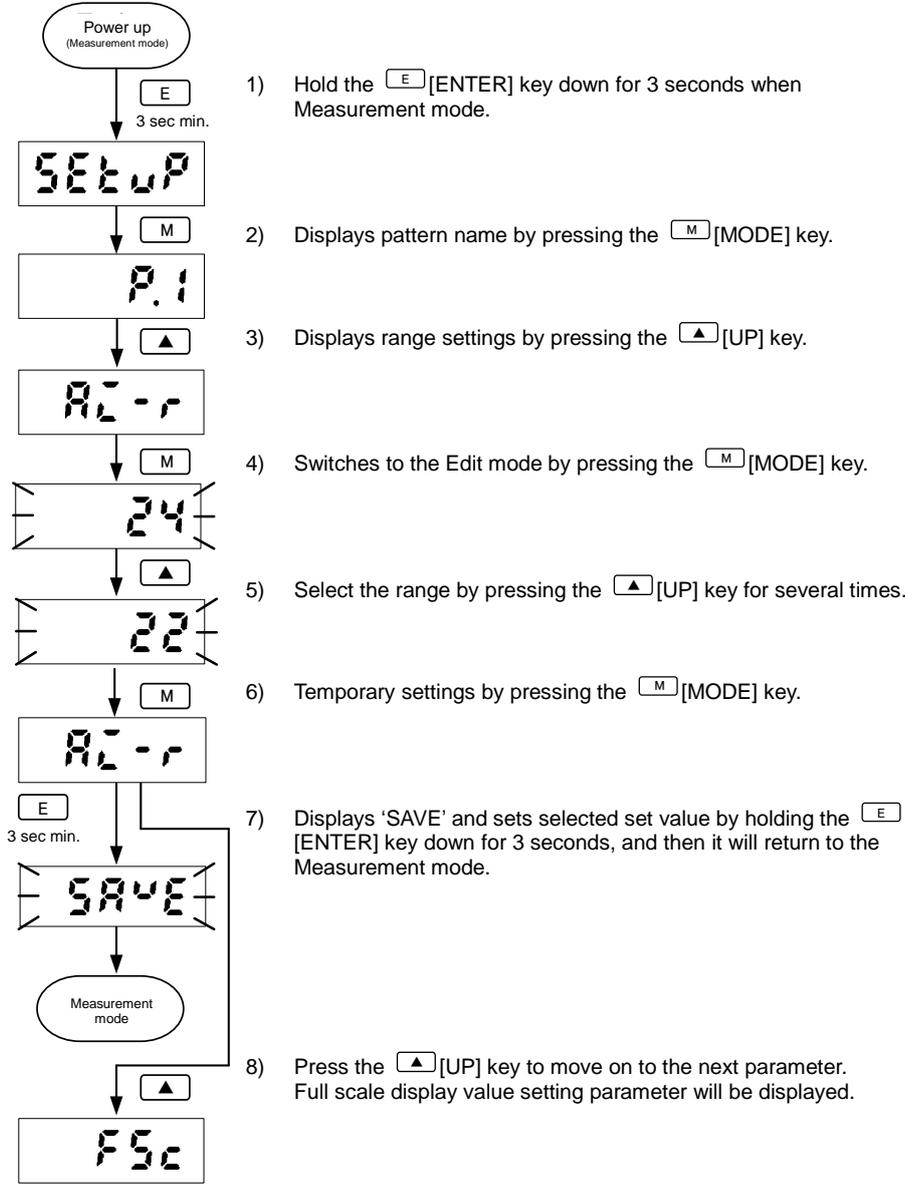

7. Operation procedure diagram

8. Measurement range settings

The default setting for measurement range is '24 (±199.99mA)' when you purchase. Please change the setting to the measurement range you want to use.

| Set value | Measurement range |
|-----------------------|-------------------|
| 21 | ±199.99μA |
| 22 | ±1.9999mA |
| 23 | ±19.999mA |
| 24 (Default value) | ±199.99mA |

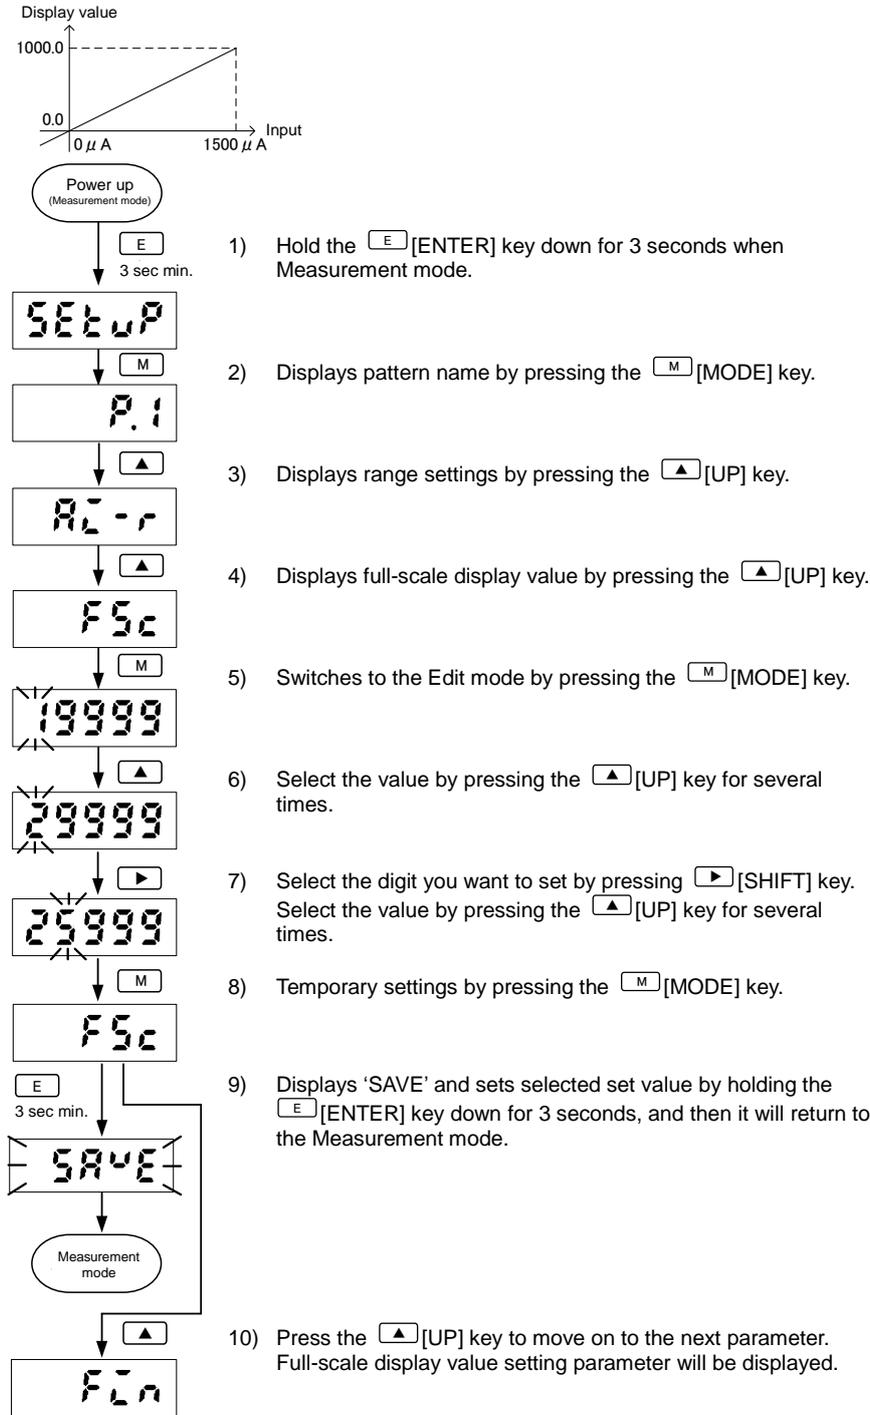

9. Scaling settings

Scaling setting is the function to display the values of the analog output signals from displacement sensors or signal converters, which is converted linear to the primary chemical quantity / physical quantity.

If you want to display 0.0 to 1000.0 when input signal is 0 to 1500μA.

| Display | Parameter | Value | Description |
|---------|--------------------------|-------|---|
| AC-r | Input range | 22 | ±1.9999mA measurement |
| FSc | Full scale display value | 10000 | Display value when input value below : 1500μA |
| FIn | Full scale input value | 15000 | Input value : 1500.0μA |
| oFS | Offset display value | 0 | Display value when input value below : 0μA |
| oIn | Offset input value | 0 | Input value : 0μA |
| dP | Decimal point position | 0.0 | Decimal point position setting |

10. Analog output

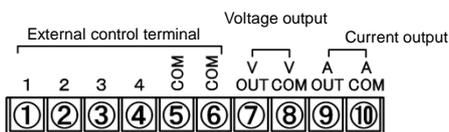

10-1. Analog output range settings

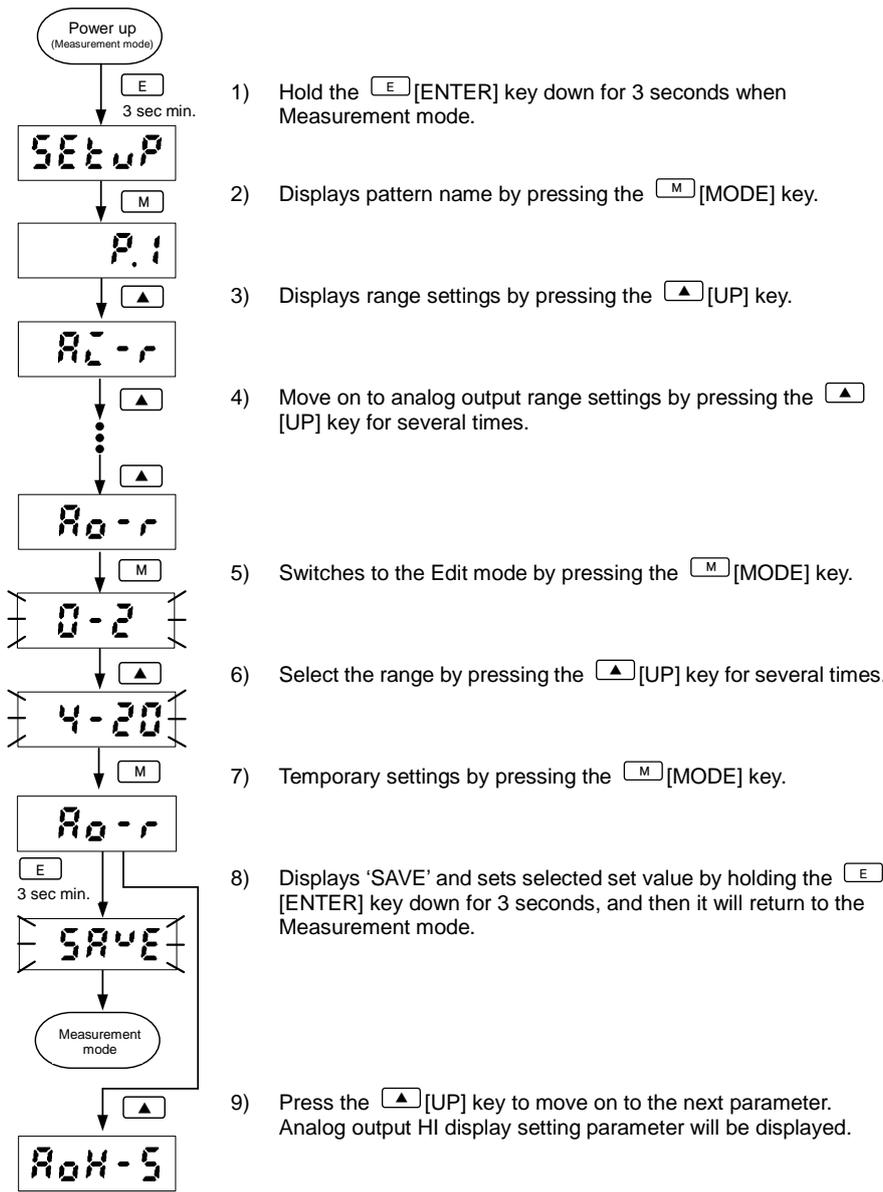

The default setting for measurement range is '0 to 2V' when you purchase. Please change the setting to the output range you want to use.

Note : Only the model with analog output option can set the output range. (WPM-1-□□-□1□-□00).

| Set value | Analog output range | Remarks |
|------------------------|---------------------|-------------------------------------|
| 0-2 (Default value) | 0 to 2V | Load resistance : more than 10kΩ |
| 0-10 | 0 to 10V | |
| -10-10 | -10V to 10V | |
| 1-5 | 1 to 5V | Load resistance : 550kΩ or less |
| 0-20 | 0 to 20mA | |
| 4-20 | 4 to 20mA | |

Caution : Differs depending on the connection terminal on voltage output and current output.

10-2. Analog output scaling settings

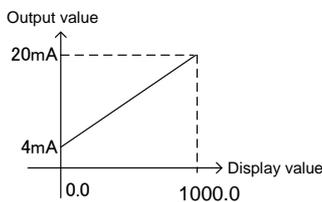

Sets the specific analog output setting according to the optional starting point and end point of display value.

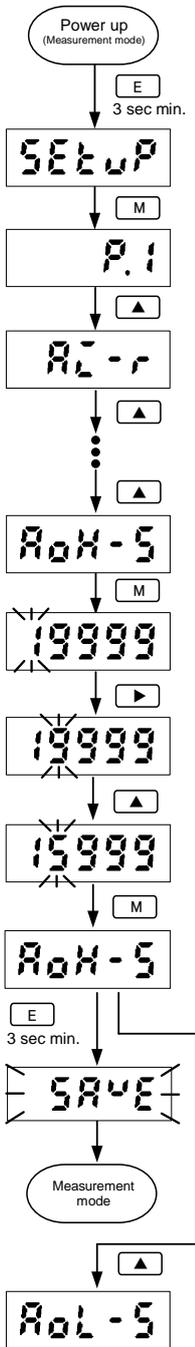

Note : Only the model with analog output option can set the output range. (WPM-1-□□-□1□-□00).

| Set value | Upper limit | Lower limit |
|-----------|-------------|-------------|
| 0-2 | 2V | 0V |
| 0-10 | 10V | 0V |
| -10-10 | 10V | -10V |
| 1-5 | 5V | 1V |
| 0-20 | 20mA | 0mA |
| -20 | 20mA | 4mA |

When the input range is 0 to 1500μA and the display scaling setting is 0.0 to 1000.0, then outputs 4mA analog signals when 0.0, 20mA when 1000.0 is displayed.

| Display | Parameter | Value | Description |
|--------------|--------------------------------|-------|---------------------------------------|
| AO-r | Output range | 4-20 | 4 to 20mA output |
| AOH-5 | Analog output HI display value | 10000 | Display value to output 20mA : 1000.0 |
| AOL-5 | Analog output LO display value | 0 | Display value to output 4mA : 0.0 |

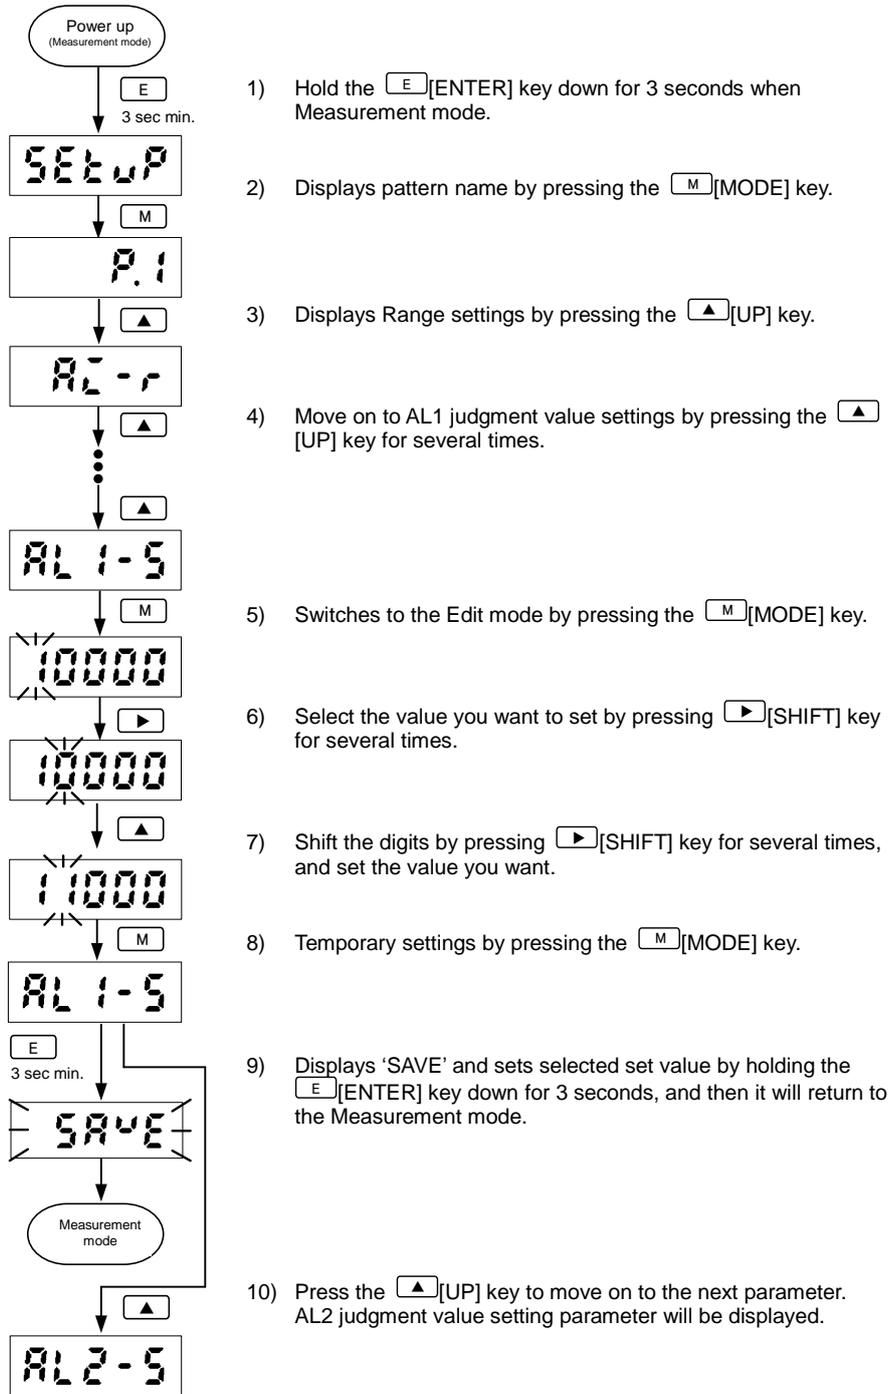

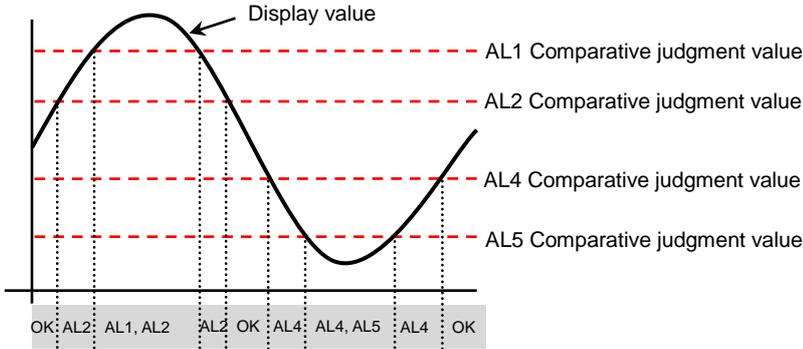

- 1) Hold the **[E]** [ENTER] key down for 3 seconds when Measurement mode.
- 2) Displays pattern name by pressing the **[M]** [MODE] key.
- 3) Displays Range settings by pressing the **[▲]** [UP] key.
- 4) Move on to analog output HI display value settings by pressing the **[▲]** [UP] key for several times.
- 5) Switches to the Edit mode by pressing the **[M]** [MODE] key.
- 6) Select the digit you want to set by pressing **[▶]** [SHIFT] key.
- 7) Select the value by pressing the **[▲]** [UP] key for several times. (Repeat 'Process 6 & 7')
- 8) Temporary settings by pressing the **[M]** [MODE] key.
- 9) Displays 'SAVE' and sets selected set value by holding the **[E]** [ENTER] key down for 3 seconds, and then it will return to the Measurement mode.
- 10) Press the **[▲]** [UP] key to move on to the next parameter. Analog output LO display setting parameter will be displayed.

11. Comparative alarm function

Normal operation

There are 3 operation types for comparative alarm function in WPM. (Normal judgment, Zone judgment, Tolerance judgment)
Explains about Normal operation in this column which is default setting.

| Judgment results | | Operating conditions |
|---|-----------------------------------|---|
| AL1 AL2 | 2 nd upper limit alarm | Display value > AL1 comparative judgment value |
| AL2 | 1 st upper limit alarm | AL1 comparative judgment value ≥ Display value > AL2 comparative judgment value |
| AL3 | OK | AL2 comparative judgment value ≥ Display value ≥ AL4 comparative judgment value |
| AL4 | 1 st lower limit alarm | AL4 comparative judgment value > Display value ≥ AL5 comparative judgment value |
| AL4 AL5 | 2 nd lower limit alarm | AL5 comparative judgment value > Display value |
| Note 1 : Setting condition of Comparative judgment value AL1 judgment value > AL2 judgment value > AL4 judgment value > AL5 judgment value Note 2 : When the hysteresis is set to the comparative judgment value, hysteresis will affects judgment operation. | | |

12. External control function

Can use each function by assigning external control terminal 1 to 4.
 It will operate during each terminal and COM terminal is short circuit or L level.
 (L level : 0 to 1.5V, H level : 3.5 to 5V, Input current : -2mA or less)

| Default condition | Terminal number | Default value | Description |
|-------------------|-----------------------------|---------------|---------------|
| | External control terminal 1 | DZ | Digital zero |
| | External control terminal 2 | SH | Sampling hold |
| | External control terminal 3 | PH | Peak hold |
| | External control terminal 4 | R.RST | Relay reset |

12-1. Digital zero function

Digital zero function is to display zero instead of the optional display value. After that, it will display the variation value from that point.
 Only if the external control terminal settings are not set, digital zero can be operated by holding the  [SHIFT] key.

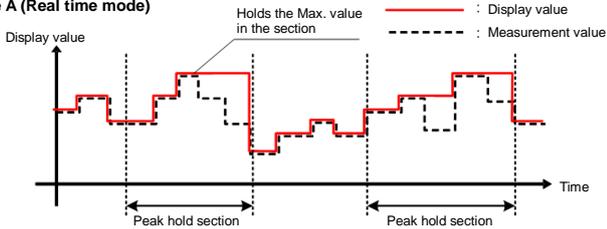

12-2. Sampling hold function

Sampling hold function is to hold the display value and output value.
 Sampling hold function has Type A (Free running mode) and Type B (One shot mode).

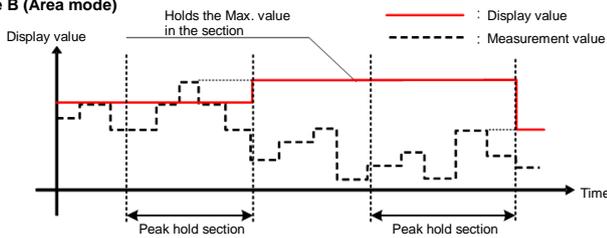

12-3. Peak hold function

Peak hold function is to always hold the larger measurement value.
 Peak hold function has Type A (real time mode) and Type B (Area mode).
 Also, there are 3 types of peak hold, Max. value (peak hold), Min. value (bottom hold), difference between Max. value and Min. value (peak-to-peak hold).

Type A (Real time mode)

Type B (Area mode)

12-4. Relay reset function

Relay reset function is to turn off all the judgment result and output of comparative alarm function during relay reset function is ON.

12-5. Pattern select function

Pattern select function is to switch the patterns of parameters for scaling setting and comparative alarm setting.
 WPM-1 can store 8 patterns in the internal memory.

It is able to switch pattern settings by following 2 ways.

- 1) Select functions of External control terminal function to P.SEL 1 to 3.
 It will operate during each terminal and COM terminal is short circuit or L level.
 (L level : 0 to 1.5V, H level : 3.5 to 5V, Input current : -2mA or less)

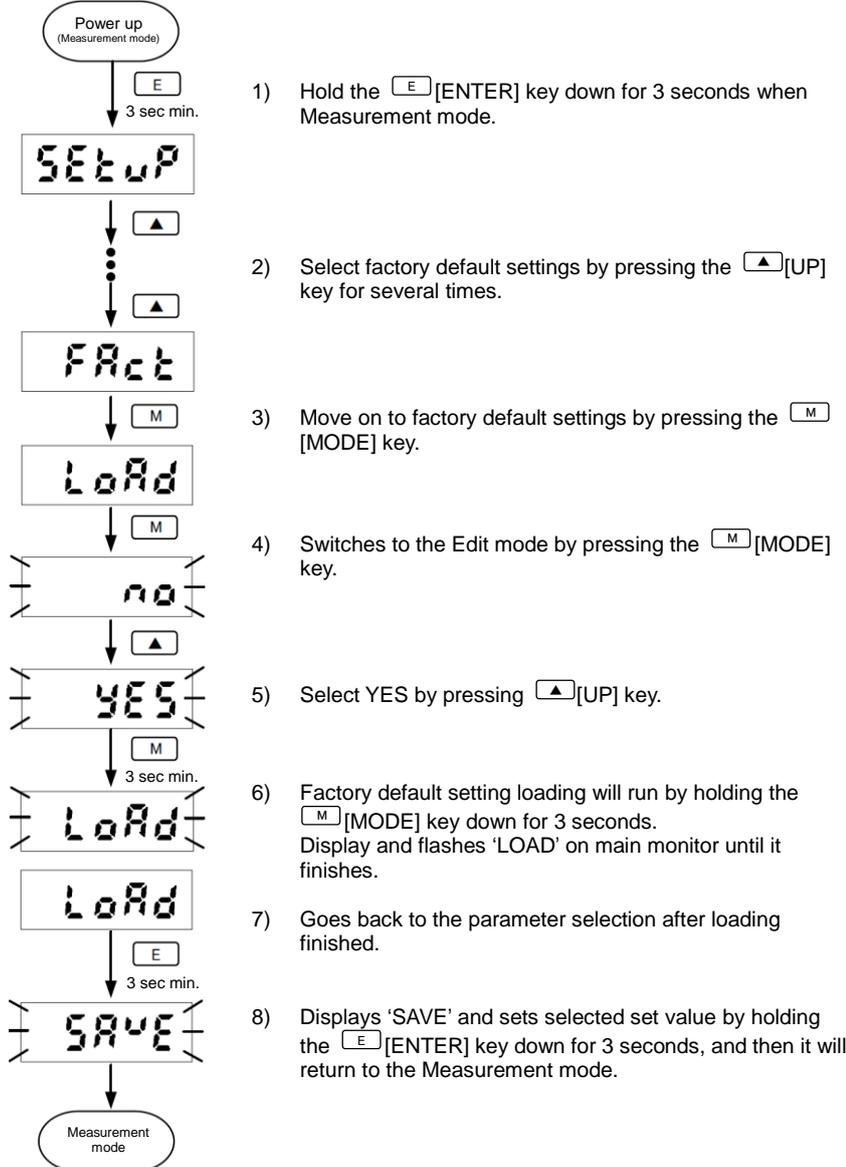

| Pattern | P.SEL1 | P.SEL2 | P.SEL3 |
|---------|-------------|-------------|-------------|
| 1 | HIGH (Open) | HIGH (Open) | HIGH (Open) |
| 2 | HIGH (Open) | HIGH (Open) | LOW (Short) |
| 3 | HIGH (Open) | LOW (Short) | HIGH (Open) |
| 4 | HIGH (Open) | LOW (Short) | LOW (Short) |
| 5 | LOW (Short) | HIGH (Open) | HIGH (Open) |
| 6 | LOW (Short) | HIGH (Open) | LOW (Short) |
| 7 | LOW (Short) | LOW (Short) | HIGH (Open) |
| 8 | LOW (Short) | LOW (Short) | LOW (Short) |

- 2) Press the [UP] key for 3 seconds from the front panel to switch the pattern setting. You can check the pattern selected by indicators P1/P2/P3 at the front panel.

| Pattern | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
|---------------------|-------------------|-------------------|-------------------|-------------------|-------------------|-------------------|-------------------|-------------------|
| Function indicators | □P1 □P2 □P3 | ■P1 □P2 □P3 | □P1 ■P2 □P3 | ■P1 ■P2 □P3 | □P1 □P2 ■P3 | ■P1 □P2 ■P3 | □P1 ■P2 ■P3 | ■P1 ■P2 ■P3 |

13. Initialize set values

Initialize the product to the factory default settings.

- 1) Hold the [ENTER] key down for 3 seconds when Measurement mode.
- 2) Select factory default settings by pressing the [UP] key for several times.
- 3) Move on to factory default settings by pressing the [MODE] key.
- 4) Switches to the Edit mode by pressing the [MODE] key.
- 5) Select YES by pressing [UP] key.
- 6) Factory default setting loading will run by holding the [MODE] key down for 3 seconds. Display and flashes 'LOAD' on main monitor until it finishes.
- 7) Goes back to the parameter selection after loading finished.
- 8) Displays 'SAVE' and sets selected set value by holding the [ENTER] key down for 3 seconds, and then it will return to the Measurement mode.

14. Troubleshooting (Error codes)

When error occurs, error code will be displayed on the main monitor according to the case of the operation

Please reference the list below to solve the problem.

| Error code | Description | Solution |
|----------------|-------------------------------|--|
| E000 E001 | FLASH error etc. | Re-start the system. Note : Please contact us if it doesn't restore. |
| E003 | Watchdog error etc. | Hold the [MODE] key down for 3 seconds. |
| E060 - E069 | Condition data error etc. | Hold the [MODE] key down for 3 seconds. Note : Restores with initialized settings. |
| E070 - E079 | Scaling data error etc. | |
| E080 - E089 | Comparator data error etc. | |
| E090 - E099 | Log area error etc. | |

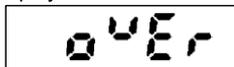

⚠ Caution

Displays 'WAIT' on main display when waiting the input signal or during the ON timing delay.

Note : External control input, analog output and comparative alarm function will be invalid during the ON timing delay.

Displays 'OVER' on main display when measured value overflowed measurement range or display range.

**15. Specifications****Common specifications**

| | | |
|---|---|--|
| Input configuration | : | Single ended |
| A/D conversion | : | $\Delta\Sigma$ conversion |
| Sampling rate | : | Max. 250 times per second |
| Display | : | Main display: red or green 7 segment LED (height 18mm) |
| Polarity | : | '-' is displayed automatically at negative polarity |
| Zero display | : | Leading zero suppression |
| External control | : | Select 4 external control and set parameter 1) Pattern select 2) Sampling hold 3) Peak hold 4) Digital zero 5) Relay reset |
| Memory protection | : | EEPROM (non-volatile memory) Number of rewrites : 1,000,000 times |
| Operating temperature / relative humidity | : | -5 to 50°C 35 to 85% (non-condensing) |
| Storage temperature / humidity | : | -10 to 70°C less 60%RH or less |
| Power supply | : | 100 to 240Vac $\pm 10\%$ 50/60Hz |
| Power consumption | : | 12VA max. at 100Vac 15VA max. at 240Vac |
| Dimensions | : | 96mm(W) x 48mm(H) x 85.9mm(D) DIN size (with comparative function : 99.7mm(D)) |
| Weight | : | approx. 250g |
| Dielectric strength | : | 2000VAC per 1 min. : Power supply terminal - input terminal / external control terminal / analog output terminal 1500VAC per 1 min. : Power supply terminal - comparative output terminal 1500VAC per 1 min. : Input terminal - External control / analog output terminal / comparative output terminal 2000VAC per 1 min. : Case - Terminals |
| Insulation resistance | : | 500VDC more than 100M Ω on the above terminals |
| Vibration strength | : | 10 to 55Hz 0.15mm X,Y,Z 30 min. |
| Front protection | : | IP66 rating (Front bezel) |
| Installation location | : | Indoors only |
| Rated altitude | : | 2000m or less |
| Overvoltage category | : | II |
| Measurement category | : | II |
| Pollution level | : | 2 |
| Compatible EN standards | : | EN61326-1 (EMS: Industrial use / EMI: Class A) EN61010-1 (Use cables shorter than 30m) |
| Case material | : | Polycarbonate, black, UL94V-0 |

Input specifications

| Range | Measurement range | Display Range (Scaling) | Resolution | Impedance | Max. allowable input | Accuracy (23 \pm 5°C 35 to 85%RH) |
|-------|-------------------------|---|--------------------|----------------------|----------------------|-------------------------------------|
| 11 | $\pm 199.99\mu\text{A}$ | Offset: : -19999 to 99999 Full scale : -19999 to 99999 Resolution : ± 19999 | 0.01 μA | Approx. 1k Ω | $\pm 10\text{mA}$ | $\pm(0.1\%$ of FS +1 digit) |
| 12 | $\pm 1.9999\text{mA}$ | | 0.1 μA | Approx. 100 Ω | | |
| 13 | $\pm 19.999\text{mA}$ | | 1 μA | Approx. 10 Ω | $\pm 50\text{mA}$ | |
| 14 | $\pm 199.99\text{mA}$ | | 10 μA | Approx. 1 Ω | $\pm 500\text{mA}$ | |

Note : 'Accuracy' is when the sampling rate is 60 times per sec or less.

- Range switch : 21 to 24 range.
- Over range display : When input exceeds the maximum display, 'ovEr' or '-ovEr'.
Also, 'ovEr' or '-ovEr' displays when exceeded the measurement $\pm 10\%$.
- Decimal point : Able to set to any digit

Output specifications

[Comparative output]

- Comparative relay : Contact rating : 125Vac 0.3A (resistance load) 30Vdc 1A (resistance load)
Number of contacts : 5 relay contacts
Minimum applicable load : 10 μ A 10mVdc
Mechanical life : More than 50,000,000 times
Electrical life : More than 100,000 times (resistance load)
- Photo coupler : Rated output : Sink current 50mA Max.
- open collector output (NPN) : Applied voltage : 30V Max
Output saturation voltage : 1.2V or less when 50mA
Number of outputs : Photo coupler output (NPN) x 5
- Operation method : Microcomputer computing type
- Setting range : -19999 to 99999
- Hysteresis : 1 to 9999 digit for each setpoints
- Comparative operation : According to sampling rate
- Setting condition : H.H.H.H.G. AL1 > AL2 > AL3 > AL4 > AL5 judgment value (GO)

| Comparative condition | Result |
|---|------------------|
| Display value > AL1 judgment value | AL1,AL2,AL3,AL,4 |
| AL1 \geq Display value > AL2 judgment value | AL2,AL3,AL4 |
| AL2 \geq Display value > AL3 judgment value | AL3,AL4 |
| AL3 \geq Display value > AL4 judgment value | AL4 |
| AL4 judgment value \geq Display value | AL5 |

H.H.H.G.L. AL1 > AL2 > AL3 > AL4 (GO) > AL5 judgment value

| Comparative condition | Result |
|--|-------------|
| Display value > AL1 judgment value | AL1,AL2,AL3 |
| AL1 \geq Display value > AL2 judgment value | AL2,AL3 |
| AL2 \geq Display value > AL3 judgment value | AL3 |
| AL3 \geq Display value \geq AL5 judgment value | AL4 |
| AL5 judgment value > Display value | AL5 |

H.H.G.L.L. AL1 > AL2 > AL3 (GO) > AL4 > AL5 judgment value

| Comparative condition | Result |
|--|---------|
| Display value > AL1 judgment value | AL1,AL2 |
| AL1 \geq Display value > AL2 judgment value | AL2 |
| AL2 \geq Display value \geq AL4 judgment value | AL3 |
| AL4 > Display value \geq AL5 judgment value | AL4 |
| AL5 judgment value > Display value | AL4,AL5 |

H.G.L.L.L. AL1 > AL2 (GO) > AL3 > AL4 > AL5 judgment value

| Comparative condition | Result |
|--|-------------|
| Display value > AL1 judgment value | AL1 |
| AL1 \geq Display value \geq AL3 judgment value | AL2 |
| AL3 > Display value \geq AL4 judgment value | AL3 |
| AL4 > Display value \geq AL5 judgment value | AL3,AL4 |
| AL5 judgment value > Display value | AL3,AL4,AL5 |

G.L.L.L.L. AL1 (GO) > AL2 > AL3 > AL4 > AL5 judgment value

| Comparative condition | Result |
|---|-----------------|
| Display value \geq AL1 judgment value | AL1 |
| AL1 > Display value \geq AL3 judgment value | AL2 |
| AL3 > Display value \geq AL4 judgment value | AL2,AL3 |
| AL4 > Display value \geq AL5 judgment value | AL2,AL3,AL4 |
| AL5 judgment value > Display value | AL2,AL3,AL4,AL5 |

- Comparative alarm function types : Normal judgment output, Zone judgment output, Tolerance output
- Comparative condition memory : 8 patterns stored in the internal memory

[Analog output]

- Conversion : D/A
- Resolution : 15bit
- Scaling : Digital scaling
- Response time : 10ms or less (0 to 90%) (When sampling rate 250 times per sec)
Note : 2ms+2(1/Sampling rate)ms or less
- Specifications by type :

| Output type | Load resistance | Accuracy | Ripple |
|-------------|------------------------|--------------------|----------------------|
| 0-2V | More than 10k Ω | $\pm(0.1\%$ of FS) | $\pm 50\text{mVp-p}$ |
| 0-10V | | | |
| -10-10V | | | |
| 1-5V | 550 Ω or less | | $\pm 25\text{mVp-p}$ |
| 0-20mA | | | |
| 4-20mA | | | |

Note : 'Ripple' is when load resistance is 250 Ω and current output is 20mA.

16. Parameter list

[Setup group list]

| Parameter | Display | Protection level | Default value | Set value |
|--------------------------------------|---------|------------------|---|--|
| Setting pattern select | P.1 | 2 | P1 | P1 to P8 |
| Input range | RL-r | 1 | 24 | 21 (±199.99μA)/ 22 (±1.999mA)/ 23 (±19.999 mA)/ 24 (±199.99 mA) |
| Full scale display value | FSc | 2 | 19999 | -19999 to 99999 |
| Full scale input value | FIn | 2 | 19999 | -19999 to 99999 |
